CV Objective

Full-Stack Engineer with a strong foundation in frontend and backend development and a growing expertise in cloud infrastructure and automation. Highly proficient in the MERN stack, with experience delivering scalable, high-performance, and user-centric applications. Skilled in building CI/CD pipelines, containerization (Docker), and cloud services (AWS). Seeking opportunities to leverage my combined DevOps and software development skills in a dynamic and innovative environment.

Work Experience

ICDAT TECH FIRM, Ikeja, Lagos

Lead developer, Software Engineer, October 2023–present

- Lead Engineer specializing in building MERN applications
- Led the design and implementation of new software features, significantly enhancing application performance and boosting user engagement
- Consistently maintained a user satisfaction rating of 85% or higher by delivering intuitive and responsive user UX.
- Surpassed project delivery targets by over 120% for 3 consecutive months, driven by a focus on code efficiency and effective team collaboration

ENGLEWOODCITY.INC, Ikeja, Lagos

WordPress Developer, (contract) October 2023–December 2023

- Customized WordPress themes and plugins, resulting in an improvement in website load times and user interaction
- Strategically managed the presentation of custom features, contributing to increased client satisfaction and higher user retention rates
- Maintained a client satisfaction rating of over 90% through attentive service and tailored solution

SWITZEL.CO, Kubwa, Abuja
React Developer, June 2022–July 2022

- Worked in a team that led UI optimization and code refactoring efforts, achieving improvements throughout the application.
- Developed and integrated new react.js components, enhancing the scalability of the application.
- Consistently received a high user experience rating by focusing on cross-device functionality and app responsiveness.
